TITLE:

System, method and computer program product for
providing an efficient trading market

Detail Description Paragraph - DETX (15):

[0025] 1. The derivative may have a limited lifetime to prevent "buy and hold" investors from using the system. This lifetime may be as short as the end of the business day on which it is purchased. It may also be as long as a month. Much longer than that and the owner/operator of the virtual trading exchange system may be exposed to "buy and hold" investors. If a user held a derivative at its expiration, the virtual trading exchange system could then automatically sell it at the then current price.
